Machine Sazi Tabriz Group

“ Manufacturer of **Universal**
and **CNC** machine tools
with more than 50 years
of experience

Brief History of the MST Company

Machine Sazi Tabriz Group (MST) was pioneered and established around five decades in year 1967 for the purpose of transfer of technology and manufacture of original equipments and machine tools with the technologic cooperation of European Countries in industrial zone, Tabriz City of Iran.

During the course of its years of professional activities and execution of its successful planning in production, was able in manufacturing and presenting the below reflected machine tools and services:

Fields of activities

- 1 - Manufacture of various Universal and CNC Lathe Machines.
- 2 - Manufacture of various Universal and CNC Milling Machines.
- 3 - Manufacture of various Vertical and Horizontal CNC Machining Centers.
- 4 - Manufacture of various Grinding and Sharpening Machines.
- 5 - Manufacture of various Drilling Machines.
- 6 - Manufacture of various Accessories Required by Tools and Spare Parts Machines.
- 7 - Presentation of technical and engineering services to customers.

UNIVERSAL LATHE MACHINE

This machine with its four hardened and ground guide ways is suitable for all turning operations both single and mass production. It can be equipped with special attachments to comply with different applications including internal drilling, external grinding and screw thread cutting.

Apron is equipped with rapid approach which reduces the time needed for machining.

When machine has idle tool holder can be moved rapidly in four directions lessening machining time and wearing of machine components.

UNIVERSAL MILLING MACHINE

FP4MD is a modern universal milling machine with appropriate size for drilling & milling medium size pieces.

This machine has both vertical and horizontal heads .

These heads are easily changed.

The machine is equipped with digital measuring system, optical scales at 3 Axes (x,y,z) and digital readout for precise movements.

The features of this machine :

Elegant design & convenient in operation, easy installation & maintenance

Milling the various dimension .

VERTICAL MACHINING CENTER

- Four rail bed for movement of the table
- Strength and dynamical, statical precision
- Automatic pallet change

Vertical machine centers manufactured in M.S.T are delivered as standards VMC CNC or with change table as an extra option because of using powerful structure and particular precision designing its elements and subassemblies, and applying the recent manufacturing technologies, this machine have an outstanding quality among similar machines.

PILLAR DRILLING MACHINE

This machine is capable of machining all usual metals, including: drilling, reaming tapping and sinking.

Its specification, strength, power, speeds, feeds are designed so as to fulfill a wide range your production needs.

This machine can be used both for single part and mass production .
